Summary

Hello, I'm a Prayag, Front-end Web-Developer based in India. I love creating beautiful websites to provide intuitive and dynamic experience to our users. The possibility of writing code from one tiny corner of the world to create websites and applications which can be beneficial to people all around the world through the power of internet is a truly humbling experience.

Relevant Skills

- JavaScript, ES6+, React, Redux
- HTML5
- CSS, Bootstrap
- Git, GitHub
- JSON API, Ajax

Projects

Blog Website

This is landing page for blog website which I created using HTML, CSS and JS (jQuery) with the help of owl carousel, Font Awesome, Google Font and Animation on scroll(aos).

[View](#)

Hotels

This is a UI for a hotel booking website. This website is built on HTML, CSS, Bootstrap, JavaScript (jQuery).

[View](#)

GitHub Finder

This is a Udemy project I did which is my first react project. In this project, I learned about state management, hooks and little bit about lifecycle methods. It also helped me understanding API request better.

[View](#)

Lyrics Finder

Find songs, artists and lyrics using the lyrics.ovh API. In this project I applied my learnings about API and tried to create a simple application.

[View](#)

Exchange Rate Calculator

Find out what your currency value. It is made with HTML, CSS and JavaScript.

[View](#)

HumanizeDuration.js

This is an open source project created by [Evan Hahn](#). In this project I updated the mocha.js. This is my first open source contribution.
